## PHARMA NORD (UK)

Pharma Nord (UK) Limited is a group and operates in a company that specializes in the nutritional supplements market. Levels in Denmark.

Strong emphasis is placed on market products which have rigorous research. This is carried out by independent

### A neat idea in sun protection

**V**ariosun Sensitive is set to revolutionise the way we protect our skin in the sun, according to 21st Century Health. The idea is that one bottle provides an adjustable sun protection lotion from factor 2 to factor 30. This is done by means of a dispenser which is equipped with a dial. The dial enables the user to adjust their desired sun protection factor at any time. When the user presses the dispenser head, the chosen protection factor is mixed in a pump system and released.

Variosun Sensitive is especially for sensitive skin and contains no chemical filters. It has been dermatologically tested and has

added ingredients aloe vera, panthenol and Vitamin E. 21st Century Health recommends it as the alternative for young children and for those with sensitive skin.

Two refillable cartridges, within the dispenser, contain SPF2 and SPF30, which are mixed according to how the dial is set. This cuts out the need for lots of factors and lots of bottles, saving on money, packaging and space. ●
